

“Best Before” and “Use By” dates on food packaging Understand them right to prevent **food waste** and **save money**

‘Best before’ indicates the date until when the food retains its expected quality

> Food is still safe to consume after the indicated **“best before”** day on the condition that storage instructions are respected and packaging is not damaged, but it might begin to lose its flavor and texture.

> **“Best before”** dates appear on a wide range of refrigerated, frozen, dried (pasta, rice), tinned and other foods (vegetable oil, chocolate, etc).

> Check if the packaging is intact, and if the food looks, smells and tastes good before throwing away food past its **“best before”** date.

> Once a food with a **“best before”** date on it has been opened, follow any instructions such as **“eat within three days of opening”**, when applicable.

“Best Before” and “Use By” dates on food packaging Understand them right to prevent ***food waste*** and ***save money***

“Use By” indicates the date until when the food can be eaten safely.

> Don't use any food after expiration of the ***“use by”*** date.

> ***“Use by”*** dates appear on highly perishable food, such as fresh fish, fresh minced meat, etc.

> Follow the storage instructions such as ***“keep in a refrigerator”*** or ***“keep at 2-4°C”***; if not the food will spoil quicker and you may risk food poisoning.

> By freezing the food at home soon after purchase, you can extend its life beyond the ***“use by”*** date, if it is frozen properly. But make sure you follow any instructions on the pack, such as ***“freeze up to the use by date”***, ***“cook from frozen”*** or ***“defrost thoroughly before use and use within 24 hours”***.

> Once a food with a ***“use by”*** date on it has been opened follow any for storage and use instructions such as ***“eat within three days of opening”***, bearing in mind that food should be consumed before the expiration of the ***“use by”*** date.
