PROTECTING NATURE

The European Green Deal

Why sustainable Food Systems?

- Because Food Systems are globally responsible for around **21-37% of total greenhouse gas (GHG) emissions**.
- Because, we are confronted to overwhelming paradoxes in the food systems:
*While, in the EU, 33 million people cannot afford a quality meal every second day,
20% of the food produced is wasted,
half of the adult population is overweight and obesity is rising.*
- Because the COVID-19 pandemic has stressed the importance of robust and resilient food systems.
- Because we are committed to achieve the United Nations' Sustainable Development Goals.

Farm to Fork Strategy: overall goals

climate
footprint

global
transition

new
opportunities

resilience

Reduce the
**environmental
and climate
footprint** of the
food system

Lead a
global transition
towards competitive
sustainability from
farm to fork

Tap into
**new
opportunities**

Create a **robust
and resilient** food
system

2030 Targets for sustainable food production

Reduce by 50% the overall use and risk of **chemical pesticides** and reduce use by 50% of more hazardous **pesticides**

Reduce **nutrient losses** by at least 50% while ensuring no deterioration in soil fertility; this will reduce use of **fertilisers** by at least 20 %

Reduce sales of **antimicrobials** for farmed animals and in aquaculture by 50%

Achieve at least 25% of the EU's agricultural land under **organic farming** and a significant increase in **organic aquaculture**

| Integrated approach from farm to fork needed

Actions focused on Food production

Farm to Fork Strategy

European Union

Actions to ensure sustainable food production

(1/2)

Adopt recommendations to MS addressing the nine specific objectives of the **Common Agricultural Policy (CAP)**, before submission draft **CAP Strategic Plans**

Revision of **Sustainable Use of Pesticides Directive** and enhancement of Integrated Pest Management

Revision of Regulations to facilitate **plant protection products containing biological active substances**

Action plan **for the organic sector** for 2021-2026 to stimulate supply and demand for organic products

Action plan for **integrated nutrient management** to reduce the pollution from fertilisers

Actions to ensure sustainable food production (2/2)

Proposal for a revision of the existing **animal welfare** legislation, including on transport and slaughter

Proposal for a revision of the **feed additives** Regulation to reduce the environmental impact of livestock farming

Legislative initiatives to enhance **cooperation of primary producers** (support position in food chain)

Clarification of the scope of **competition rules** with regard to sustainability in collective actions

Proposal for a **Farm Sustainability Data Network** (data and advice on sustainable farming practices)

Actions focused on food producers and retail

Farm to Fork Strategy

European Union

Actions to stimulate sustainable practices by food industry and retail, hospitality and food service

Initiative to improve the **corporate governance framework** (integrate sustainability into corporate strategies)

Develop an EU code and monitoring framework for **responsible business and marketing conduct** in the food supply chain

Stimulate **reformulation** of processed food, including setting of **maximum levels for certain nutrients**

Set **nutrient profiles** to restrict promotion of food high in salt, sugar or fat

Proposal revision EU legislation on **Food Contact Materials** (food safety, environmental footprint)

Revision **EU marketing standards** for agricultural, fishery and aquaculture products (ensure uptake and supply of sustainable products)

Enhance coordination to tackle **Food Fraud**

Actions focused on consumers

Farm to Fork Strategy

European Union

Actions to promote shift towards healthy, sustainable diets

Determine the best modalities for setting **minimum mandatory criteria for sustainable food procurement**

Review of the **EU school scheme** legal framework: refocus on healthy and sustainable food

Review of the **EU promotion programme** for agricultural and food products (aimed at sustainable production and consumption)

Proposal VAT rates (currently being discussed in Council): could allow to make more targeted use of rates (e.g. to support organic fruit and vegetables).

Proposal for a harmonised **mandatory front-of-pack nutrition labelling** to enable consumers to make health conscious food choices

Proposal to require **origin indication** for certain products.

Proposal for a **sustainable food labelling framework** to empower consumers to make sustainable food choices

Nutrition - health

Nutrition Declaration	Per 100 g
Energy	kJ/kcal
Fat	g
of which saturates	g
Carbohydrate	g
of which sugars	g
Protein	g
Salt	g

Environment

Social

New framework legislation on a Union sustainable food system

Farm to Fork Strategy

European Union

New framework legislation on a Union sustainable food system

- Currently no dedicated EU framework law on food sustainability similar to the EU framework law on food/feed safety, i.e. General Food Law (GFL)
- Different pieces of legislation address some components of food sustainability, e.g. Pesticides, GMOs, (food) waste, the Common Agricultural Policy (CAP) and Common Fisheries Policy (CFP), Plant Reproductive Material ... but none do so holistically
- Fitness Check of the GFL (2018) → regulatory framework found largely inadequate to address the new challenges of food sustainability
- Objective: **ensure that all foods placed on the EU market increasingly become sustainable through a socially responsible food value chain.**
 - an enabling environment for future policy and legislation, ensuring coherence with all EU food related policies in terms of sustainability objectives;
 - a favourable and transparent food environment making it easier to choose healthy and sustainable diets;

| Enabling transition – Promoting global transition

- International cooperation to **support developing countries in their transition to sustainable food systems**;
- Inclusion of ambitious sustainability chapter, including on food, in all EU bilateral **trade agreements**.
- Work through **international standard setting bodies (e.g: Codex)** and promotion of sustainable food systems in **international fora and events** (e.g. UN Summit on Food Systems in 2021).
- **Environmental aspects** taken into account when **assessing requests for import tolerances** for pesticide substances no longer approved in the EU
- Promotion of appropriate **labelling schemes** – to ensure that food imported into the EU is gradually produced in a sustainable way.

For healthy people,
healthy societies
and a healthy planet.

The Farm to Fork Strategy
