Declaration provided by Sweden:

“The authorisation of placing on the market of products containing, consisting of, or produced from genetically modified the maize DP4114 x MON89034 x MON87411 x DAS40278-9 och dess underkombinationer is on the agenda for this meeting. The authorisation does not include cultivation. The maize DP4114 x MON89034 x MON87411 x DAS-40278-9 och dess underkombinationer is tolerant to glufosinate-ammonium-based herbicides.

The Swedish Board of Agriculture and the National Food Agency make the same conclusion as stated by EFSA i.e. this product is safe for human and animal health as well as for the environment. Sweden therefore votes in favour of granting the product authorisation according to the Commission proposal.

This does not preclude the Swedish vote on a possible future granting of authorisation of cultivation of seeds that are tolerant to glufosinate-ammonium.”

Consequently, the Chair informed the Committee that the draft Decision will be submitted to the Appeal Committee.
